Declaration by SGS INTRON Certificatie B.V.

This process certificate has been issued on the basis of assessment guideline SIKB 2000, version 7.0 dated 07-03-2022, in accordance with the SGS INTRON Certificatie Regulations for Certification and Attestation. This certificate is valid for the following protocol:

Protocol 2003: Field work for environmental water bed investigation, version 7.0

On the basis of the certification audit carried out, SGS INTRON Certificatie B.V. hereby declares that there is justified confidence that the processes carried out by Tijhuis Ingenieurs B.V. continue to comply with the process specifications laid down in this process certificate. Tijhuis Ingenieurs B.V. thereby complies with the standard document applicable to the certification.

For the purposes of the Soil Quality Decree (Besluit bodemkwaliteit), the certified organisation is an organisation recognised by the Minister of Infrastructure and Water Management, provided that its certificate is included in the overview of recognised soil intermediaries on the website of Rijkswaterstaat Leefomgeving Bodem+: www.bodemplus.nl.

This certificate was issued on 8 July 2026 and is valid until 26 June 2028.

SGS INTRON Certificatie B.V.

ing. L.J.M. Grannetia

Certification Manager

1. PROCESS SPECIFICATIONS

Fieldwork for environmental soil and water bed investigations is carried out in accordance with the guidelines in Protocol 2003 of the SIKB 2000 assessment guideline for the process certificate Fieldwork for Environmental Soil and Water Bed Investigations. Where no dates are stated, the correct publication dates of the documents mentioned are given in the SIKB 2000 assessment guideline, which is referenced at www.sikb.nl.

2. NOTES FOR THE USER

This certificate relates only to the protocol stated in the certificate and applied by the company.

This certificate is a process certificate based on the system for the certification of processes supported by an audit of the management system, as described in NEN-EN-ISO/IEC 17067.

The client can recognise that the assignment given to the contractor for the fieldwork is being carried out under certificate, because the contractor is required to state this in its quotation and in its reporting to the client.

In the event of complaints, the client may contact the certificate holder and, if necessary, SGS INTRON Certificatie B.V.
